

Anthony Daykin, Chief of Police

CAMPUS WATCH ALERT

On August 3, 2009, a bat was found at the Arizona Stadium located at 540 N. Vine. Pima County Animal Control responded to the area and the bat was removed without incident.

As bats have been known to carry the rabies virus, The University of Arizona Police Department would like to take this opportunity to remind everyone to employ good safety practices when dealing with those bats that reside in Arizona Stadium or any other animal encountered on campus. If you should find a bat, do not attempt to touch or move it. Please call the UAPD immediately with the location of the animal so that it can be safely removed by personnel trained to perform this function.
